INSTALLATION GUIDE

1. INTRODUCTION

You have 2 different ways of installing this pack:

- **Auto-Mode**
- **Manual-Mode**

Below will show you how to install this pack correctly. REMEMBER to make a backup of your game before you install this.

We'll start off with going through the procedure of installing this pack in "Auto-Mode".

2. AUTO-MODE

After downloading GTAIV Peds to SA Pack (v0.5 FINAL), if you're using Windows Vista or 7 make sure you open "IV2SA5.exe" by right-clicking the file and then clicking "Run as Administrator" to avoid any problems.

Here on the first page that you'll encounter, you'll have a choice between installing this pack by "Default Installation" or "Custom Installation". Clicking Default will install this pack to "C:\Program Files\Rockstar Games\GTA San Andreas" while Custom will let you choose where you want to install this. For this we'll click on "Custom Installation".

We'll start off with going through the procedure of installing this pack in "Auto-Mode".

The next page allows you to direct where you want to install this pack and to select different options during the installation process. Below are the list of options and information for each of them:

"Install and View Special Menu": By ticking the box, this allows you to view and install any of the bonus peds that are available in this pack.

"Install More Peds Patch": By ticking this box, the setup will install data files and a cleo script which will enable all of the peds available in the gta3.img to appear in San Andreas (Also unlocks 2 more gangs)

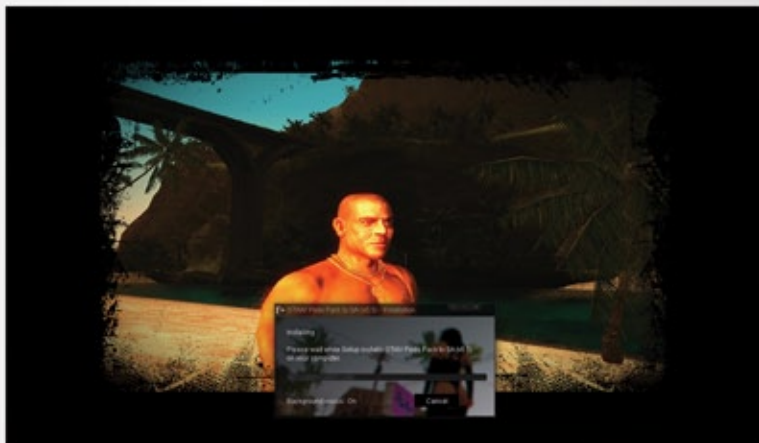

"Install in Auto-Mode": By ticking this box, the setup will after extracting all of the files (and the bonus peds that you have selected to install) rebuild you're gta3.img for you.

WARNING: Auto-Mode only works on gta3.img files that are below in **1.9 GB** in size. The rebuild function will not work on img files bigger than that size.

Once you have selected what options you want, click on the browse to select your GTA SA install directory.

WARNING: Make sure you have selected you're install directory, you'll know you have done this correctly when after clicking OK you get this message: "This Folder.....Already Exists. Would you like to install to that Folder Anyway?"

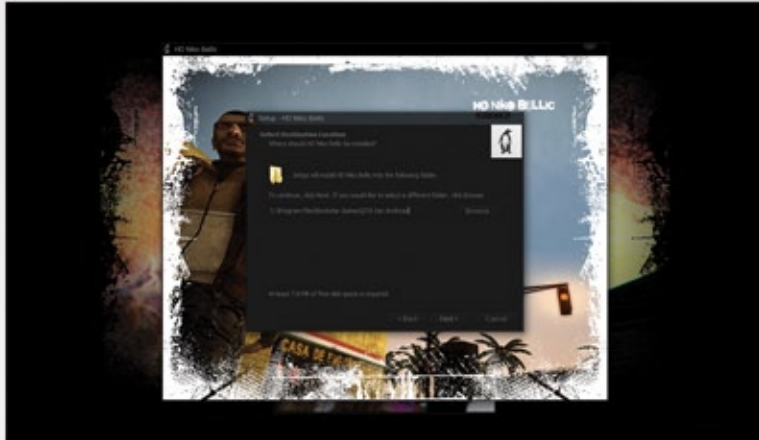

Once you've made sure you've done everything correctly, click on Install.

If you've selected the "Install and view Special Menu" option, then this menu will show up. Here lists all of the bonus peds that you can install. You can choose as many as you please, and can install this anywhere else as well as you're GTA SA directory to test the special ped(s) out. For this example I'm going to install "HD Niko Bellic"

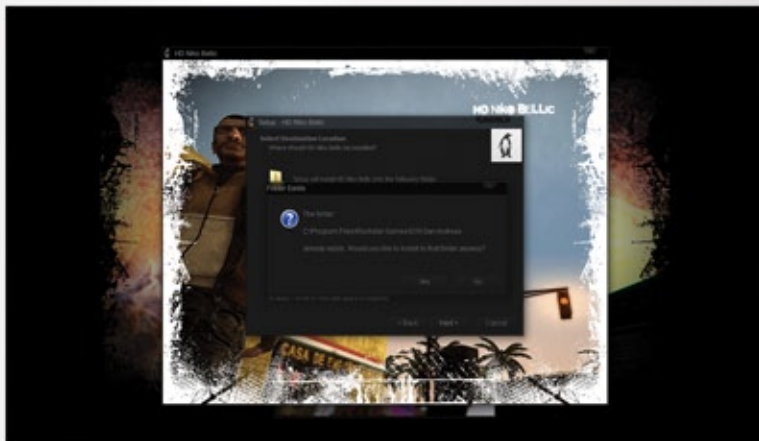

Click on the "Install [BonusPed Name]" to start the install process

Follow the instructions and choose you're directory

NOTE: If you're going to install the bonus ped in you're GTA SA, bear in mind that it will replace one of the default peds unless you install this else where.

Like before if you're installing the ped in you're GTA SA directory, you'll now you've selected the folder correctly when this message box appears.

NOTE: Keep in mind installing a bonus ped elsewhere won't get added into you're gta3.img if you chose "Auto-Install Mode".

Once you have selected and installed you're selected bonus peds, quitting the menu will start importing the peds into you're gta3.img

Once the setup imports all of the peds, the IMG Rebuilder will appear and rebuild you're gta3.img

WARNING: *Do not at this stage quit the setup as it can corrupt you're gta3.img!*

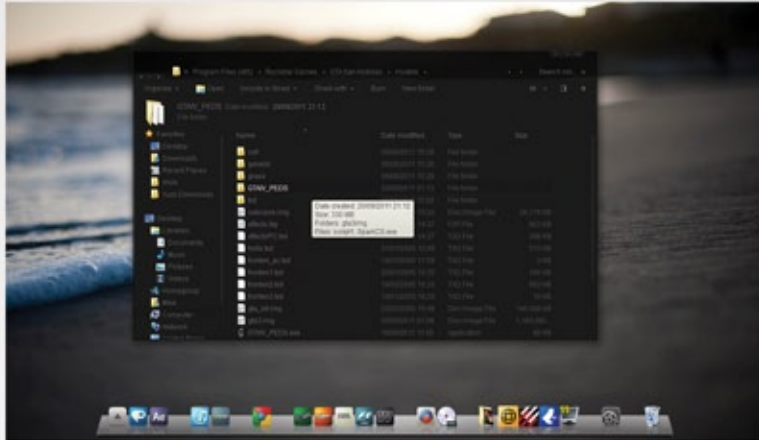

Once the rebuilding process is done, you'll see this finish dialog. Congratulations! You've successfully installed GTAIV Peds to SA Pack v0.5!

3. MANUAL-MODE

Installing this pack in Manual-Mode has almost the exactly the same steps as in Auto-Mode but ofcourse choosing different options.

When you get to this page, make sure the "Install in Auto-Mode" option is deselected (Doesn't have a tick in the box next to it) and choose where you want to install this pack

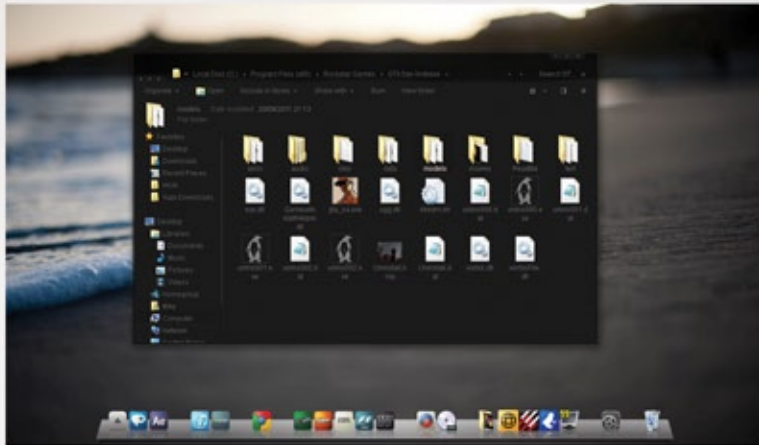

After the installation is finished, to find the peds. Go to you're where you chose to install this pack, there you'll find a Models folder, open that to find a "GTAIV_PEDS", again open that to find a "gta3img" folder where all of the peds are

UNINSTALLATION GUIDE

Once you have installed, tested and made sure this mod works. Or realised you made a mistake and want to attempt to install this again, then follow the one simple step below to clean up you're folder.

In the directory where you installed this pack, there will be one or more "unins00x" (x denotes number) depending how many options and bonus peds you selected to install. To uninstall everything, first double click on the "unins00x.exe" that has the highest number (In the picture above for me it would be "unins002.exe" and carry on uninstalling the files back down until "unins000.exe" (unins000.exe should always be uninstalled last)

NOTE: Uninstalling will not remove any of the GTA files, it will only remove the files that were needed from the setup. Also uninstalling does not mean reverting you're game back to default, this is another reason why you should make a BACKUP before installing this pack

Normal Maps

Most of the GTAIV peds in this pack are now compatible with Ryosuke839's Normal Map mod. What this means is that peds now can show alot more detail and able to show lighting of bumps and dents on the clothing. This mod allows us to add the bump textures from GTAIV into SA, thus making the peds one step closer to looking like they're still in GTAIV. The mod which enables this can be downloaded from this link: <http://hotmist.ddo.jp/plugin/normalmap/index.html>

The requirments for this mod to work can be found below:

- *No DVD GTA:SA with 14,386,176 bytes or 14,383,616 bytes*
- *DirectX 9.0c or higher*
- *Pixel Shader 2.0 or higher (Recommended 3.0)*
- *Vertex Shader 2.0 or higher*
- *3 Texture stages or higher*
- *D3DDECLUSAGE_TANGENT supported*
- *D3DDECLUSAGE_BINORMAL supported*

With Normal Map

Default

The Bump Maps are NOT compatible with SAMP or MTA. Also this mod is NOT a requirement.

Frequently Asked Questions

QUESTION #1

SOME PEDS DON'T SEEM TO FIT IN WITH THE STORYLINE?

THIS PACK WAS MAINLY DONE FOR THE MULTIPLAYER CLIENTS SAMP & MTA-SA AND NOT FOR THE SINGLE PLAYER ASPECT OF THE GAME.

QUESTION #2

WHY DIDN'T YOU RELEASE ALL OF THE PEDS SEPERATELY?

I GAVE THE REASON BACK WHEN THE FIRST PACK WAS RELEASED, AND THAT WAS TO HAVE AS MANY IV PEDS AS POSSIBLE IN ONE DOWNLOAD, ONE PLACE INSTEAD OF FORCING THE USER TO SEARCH HIGH AND LOW THROUGHOUT THE INTERNET TO FIND ONE PARTICULAR PED.

QUESTION #3

WHY DID IT TAKE SO LONG TO RELEASE?

I NEVER WANTED TO RELEASE THIS ORIGINALLY. THE VIDEO WAS UPLOADED EARLY AS YOUTUBE FIXED THEIR UPLOADING ISSUES AND JUST UPLOADED THE VIDEO EARLY TO GET THAT OUT OF THE WAY BEFORE THEIR PROBLEM STARTED AGAIN (WHICH IT DID 2 WEEKS LATER)

QUESTION #4

WHY DO I HAVE TO INSTALL THIS PACK THIS WAY?

BECAUSE OF THE AMOUNT OF PEDS THAT THIS PACK CONTAINS. I WANTED TO DO A SETUP FOR PEOPLE WHO WANTED TO INSTALL THIS HANDS FREE INSTEAD OF MESSING ABOUT WITH WHATEVER IMG TOOL THEY WERE USING. ALSO WANTED TO COMPRESS THIS PACK AS MUCH AS I CAN AS COMPRESSING THIS PACK IN RAR OR ZIP, THE FINAL SIZE WOULD BE HEFTY FOR USERS WHO HAVE RELATIVELY SLOW INTERNET SPEED (LIKE MYSELF)

BELOW ARE COMPARISONS BETWEEN DIFFERENT COMPRESSED FILE FORMATS (MAIN INSTALLATION)

UNCOMPRESSED: 332 MB
ZIP: 152 MB
RAR: 148 MB
7Z: 108
ARC: 97.7MB

BELOW ARE COMPARISONS BETWEEN DIFFERENT MODS AND THEIR SIZES (ONLY TAKING INTO ACCOUNT THE MAIN COMPRESSED FILE)

GTAIV PED PACK TO SA (V0.5):	97.7 MB (335 PEDS)
GTAIV PED PACK TO SA (V0.3):	98.4 MB (200 PEDS)
GTAIV TO SA REPACK:	118 MB (100 PEDS)
GTA IV PEDS TO SA PACK [100 PEDS]:	36.1 MB (ONLY 95 PEDS) (TAKEN FROM LIBERTYCITY.RU)

QUESTION #5

I'M GETTING AN ERROR WHEN IT IS REBUILDING, IT'S SOMETHING IN FRENCH?

IF YOU GET THAT ERROR WITH IMG REBUILDER IT MEANS THAT WHEREVER YOU INSTALLED THE PACK, IT CANNOT FIND THE GAME'S GTA3.IMG (REMEMBER WHEN CHOOSING THE DIRECTORY, CHOOSE THE FOLDER THAT CONTAINS THE GTA_SA.EXE)

Peds Stolen?

I ORIGINALLY WANTED TO SAY ABOUT MY SIDE OF THIS FIASCO BACK WHEN V0.4 WAS RELEASED, BUT HELD BACK. SO I DECIDED IT WAS A GOOD IDEA TO TALK ABOUT THIS SUBJECT WITH THE FINAL RELEASE OF V0.5.

LET ME START OFF SAYING THIS, I DID NOT STEAL ANY PEDS. WHEN I STARTED DOING V0.3, A YOUTUBE USER BY THE NAME OF ROCKSTARGAMESHD CONTACTED ME AND SAID HE WANTED TO HELP OUT. AFTER SENDING ME 'HIS' LUIS LOPEZ PED, I STRAIGHT AWAY SAID YES! NEARER TO THE RELEASE OF V0.3, HE SENT ME WELL OVER A DOZEN PEDS AND AS USUAL WHEN CLOSE TO A RELEASE, I UPLOADED THE V0.3 VIDEO ON YOUTUBE.

A VERY HELPFUL YOUTUBE USER (NAME WITHDRAWN FOR REASONS) TOLD ME THAT A FEW OF THE PEDS IN THE VIDEO (PRETTY MUCH ALL OF THEM GIVEN BY ROCKSTARGAMESHD) WAS TAKEN FROM THIS SITE [HTTP://WORLD-GTA-MOD.3DN.RU/](http://WORLD-GTA-MOD.3DN.RU/). I DID TRY TO CONTACT THE REAL AUTHOR OF THOSE PEDS ON THAT SITE, APOLOGISING FOR NOT REALISING THEY WERE HIS PEDS AND IF IT WAS REMOTELY POSSIBLE (I DIDN'T HAVE ANY HOPE) IF I COULD RELEASE V0.3 WITH HIS PEDS BUT GIVE CREDITS TO THE AUTHOR AND PROMISE THAT THEY GET REMOVED IN V0.4. I DECIDED TO RELEASE V0.3 WITH HIS PEDS AFTER NOT GETTING ANY REPLY (STILL GIVING CREDITS TO ROCKSTARGAMESHD, BUT ASKING FOR THE REAL AUTHOR TO GET IN CONTACT).

I AM TO BLAME FOR CREDITING ROCKSTARGAMESHD FOR THE STOLEN PEDS, AS I WAS TAKING NOBODY'S SIDE IN WHO OWNED THOSE PEDS. AFTER VISITING THE WGM SITE TO SEE IF I GOT A REPLY, I SAW MY SITE ON THEIR HOMEPAGE WITH THE TITLE 'PED IV TO SA AMERIKOSY STOLEN!' WHICH CONFIRMED THEY WEREN'T ROCKSTARGAMESHD'S PEDS. QUITE A HUGE EMBARRASMENT!

AFTER CONFRONTING ROCKSTARGAMESHD ABOUT THIS, HE WAS ADAMENT HE DIDN'T STEAL THEM (IT WAS OBVIOUS HE STOLE THEM) BUT I'M PARTLY TO BLAME FOR NOT ACTUALLY MAKING SURE THEY WERE STOLEN (I ONLY DISCOVERED THE WGM SITE AFTER THE HELPFUL USER SHOWED ME THE STOLEN PEDS). WHAT ACTUALLY ANNOYED ME WAS THE INFORMATION FROM THE POST ABOUT MY SITE:

"MY FRIENDS, I WANT TO SAY THAT PAK WILL NOT PUBLICLY PEDOV! WILL BE SENT A LINK TO EACH ACTIVE USER ON THE SITE, THOSE WHO HAVE AN AMERICAN IP ADDRESS OF THE LINK WILL NOT SEE! ASK WHY, I SAY, NOW THE USER UNDER THE NAME THREW ME JEKSAN LINK TO THE SITE WITH OUR PEDAM!! THAT IS, PLAGIARISTS FROM ABROAD HAVE DOWN-LOADED THE PACK FROM THE PROJECT PED IV TO SA WHICH I CLOSED BECAUSE OF THE BUGS AND THE NEW PED IV TO SA ARE BUSY EF_STREET, STUPIDLY JOINED IN AND GAVE ONE OF HIS!

HERE IS A LINK TO THIS SITE CLICK

HERE NICKNAME OF OUR THIEF MIKE_SAMAKI'S"

OK THERE IS ONE THIEF.....WHERE IS THE OTHER? ROCKSTARGAMESHD? DID I FORGET TO CREDIT HIM? (EVEN SO HE STOLE THEM) BESIDE THAT, ARE ALL OF THE PEDS NOW CONSIDERED TO BE STOLEN FROM WGM? SO THE PEDS THAT I RIGGED AND CONVERTED FROM V0.1, V0.2 & V0.3 ARE NOW CONSIDERED TO BE THE PROPERTY OF WGM? (EXCLUDING THE ONES STOLEN BY ROCKSTARGAMESHD). AT THAT POINT I HAVE A BIT OF HATRED TOWARDS THE WGM SITE, HENCE FOR SOME OF THE 'SPECIAL' PEDS IN THIS PACK.

Extended 50x

SO I WOULD ADVISE THE AUTHOR FROM THAT SITE TO ACTUALLY FIND OUT A BIT MORE ABOUT THE SO CALLED 'STOLEN IV2SA PEDS PACK' BEFORE MAKING ACCUSATIONS AGAINST THE ONE 'THIEF' WHICH IS ME INSTEAD OF THE THE ACTUAL THIEF ROCKSTARGAMESHD. HERE IS A LINK TO ROCKSTARGAMESHD'S YOUTUBE CHANNEL: [HTTP://WWW.YOUTUBE.COM/USER/ROCKSTARGAMESHD](http://www.youtube.com/user/rockstargameshd)

THE V0.3 PACK WHEN RELEASED HAD MORE PEDS THAN THE PACK HOSTED BY WGM, EVEN REMOVING THE STOLEN PEDS MY PACK WOULD STILL HAVE MORE, BUT ACCORDING TO WGM ALL OF THE PEDS WERE STOLEN. BIT PATHETIC REALLY. IT'S ALSO QUITE HILARIOUS THAT USERS WITH AN AMERICAN IP ADDRESS WILL NOT GET THE LINK TO THEIR PED PACK AFTER WGM POSTED THAT INFO ABOUT MY SITE.

ALSO REMEMBER MYSELF, THE AUTHOR OF HIS PEDS AND EVERYONE ELSE WHO HAS RIGGED GTA IV PEDS BEFORE DON'T ACTUALLY OWN THE PEDS THAT WE RIG. THEY ARE PROPERTY OF ROCKSTAR, AND SHOULD BE SHARED WITH THE COMMUNITY AND NOT HOARDED OR CLAIM THEY OWN THEM LIKE WGM DOES.
